EXPERIENCE

Topaz, São José do Rio Preto, BR (Remote)— *Senior Software Engineer - React, React Native*

NOV 2023 - PRESENT

Experience in developing mobile applications using React Native, including module development, sales portals, and maintenance of existing systems. Consistently supported the team to ensure timely deliveries with a strong focus on code quality and performance.

Main tech: **React, React Native, Javascript and Typescript.**

Youhull, Brasília, BR (Remote)— *Software Engineer - React Native*

JAN 2021 - JUL 2025

Development of loyalty/benefits-club applications, integrating with private SSOs, Google Maps, and geolocation check-ins, operating a white-label platform for 100+ apps, with CI/CD for all applications.

Main tech: **React Native, Typescript e Javascript.**

Compass Uol, Passo Fundo, BR (Remote)— Mid *Software Engineer - React, React Native*

MAR 2023 - NOV 2023

Feature development for **Natura & Co**, focusing on the financial module of both the web application and mobile app, ensuring performance, usability, and maintainability of the codebase.

Main tech: **React, React Native, Typescript and Javascript.**

Corpstek Technology, Natal, BR — *Full Stack Software Engineer - React, React Native, Node*

MAR 2021 - MAR 2023

Responsible for developing mobile applications and websites, while also handling DevOps tasks using **AWS** and **Node.js**. Led a team of 6 developers, ensuring technical alignment, code quality, and successful project deliveries.

SKILLS

I have experience with a wide range of tools including:

React Native, React, Node, Typescript, Mysql, Postgres, TypeORM, Prisma.io and JS

I've applied these skills in multiple large distributed systems used by companies around the world.

HIGHLIGHTS

Designed and **Lead** the B2B **system migration** inside kki.autonorte.com.br

Helped design a **search engine** capable of **finding** hundreds of thousands of parts in B2B with orders and stock **updated in real time**

Designed a check-in service via **geolocation** for the Uzeh app, which **manages the collection of recyclable waste.**

Participated in the refactoring process of the **financial module** of the Natura & CO app, which has **thousands of accesses daily.**

Main tech: **Javascript, React, React Native, Node, Postgres, Mysql, TypeORM and Socket.io**.

Freelancer, Natal, BR — *Full Stack Software developer*

Mar 2018 - MAR 2021

Developed management systems for various sectors, including gyms, car wash services, and snack shops. Created institutional websites and customized platforms focused on process automation and user experience

Main tech: **Javascript, React, React Native, Node, Postgres, Mysql, TypeORM and Socket.io**

Velty, Natal, BR —Front end developer

MAR 2012 - NOV 2016

Developed websites and integrated them with the company's proprietary framework, ensuring compatibility and performance.

Main tech: **HTML, CSS, PHP and Javascript**
